NOTES ................................................................. pg 35
Dear d.health Executive Summit Participants:

We are delighted to host the d.health Executive Summit in New York City at this historic World Trade Center site for a second year. Thank you for joining us in a collaborative effort to disrupt healthcare to allow Americans to Age at Home.

This year’s Presidential primary campaign has largely ignored an issue paramount to a growing segment of our population. Nearly 90% of Americans prefer to age at home, yet barriers, such as antiquated reimbursement and licensing policies, prevent Americans from realizing this goal. To address this political “blind spot,” the Summit assembles health, technology, finance and policy leaders to discuss today’s best ideas, form tomorrow’s partnerships, and launch the care models of the future.

The d.health Summit agenda features more than 10 CEOs and numerous thought leaders who are disrupting healthcare to modernize homecare, provide virtual visits into the home, transform the insurance industry, redesign and reframe successful aging, and revolutionize medical education. Noted journalists from The New York Times, The Atlantic, and Fast Company will moderate the panel sessions. Nationally-known leaders in healthcare and the aging space will join new entrants to the market to provide unique perspectives and discover synergies.

Many thanks to our generous partners, our advisory board, our speakers, and the d.health staff for making this event possible.

We look forward to an exciting day of discussion and collaborative thinking.

Avi & Ray
New York City, May 4, 2016
RAY DORSEY, MD, MBA

Dr. Ray Dorsey is the David M. Levy Professor of Neurology and Director of CHET, a center that seeks to improve global health through novel clinical research, at the University of Rochester Medical Center. Through creative applications of technology, he and his colleagues want to enable anyone anywhere to receive care, participate in research, and benefit from therapeutic advances.

Most recently, Dr. Dorsey helped to develop an iPhone mobile app called mPower, which allows patients with Parkinson’s disease to track their symptoms in real time and share this information with researchers. Apple’s recently announced CareKit will turn the mPower ResearchKit™ study into a valuable tool to help better inform patients about their condition and care providers about treatment.

Dr. Dorsey previously directed the movement disorders division and neurology telemedicine at Johns Hopkins and worked as a consultant for McKinsey & Company. In 2015, he was recognized as a White House “Champion for Change” for Parkinson’s disease. Dr. Dorsey’s research has been published in leading medical, neurology, and economic journals and has been featured on National Public Radio, in The New York Times, and in The Wall Street Journal.

PROFESSOR ABRAHAM SEIDMANN

Professor Avi Seidmann is a Chair Faculty at the Simon Business School, University of Rochester (Information Systems, Operations Management & E-commerce), and has been awarded several prestigious prizes for his outstanding research and software development projects. He has over 30 years of proven experience in developing and implementing complex information systems around the globe. Seidmann has consulted with many of the leading industrial and service corporations and presented numerous research and executive seminars on four continents. His research was cited twice on the front page of The Wall Street Journal, and he has been granted several prestigious prizes at international conferences for publishing outstanding research papers in the areas of information systems, information economics and electronic commerce.

Professor Seidmann is the author of over 100 research articles, which appear in many of the leading scientific journals, and has been the founding department editor on interdisciplinary management research and applications in Management Science for 10 years. His current research and consulting activities include medical informatics, electronic commerce, online auctions, information systems, health care management, business process design, project management and optimal resource allocation, strategic manufacturing systems, information economics, stochastic processes and performance modeling for capacity planning and pricing.
SENATOR TOM DASCHLE  
Founder & CEO, The Daschle Group  
Senator Tom Daschle served as the Senate Majority Leader and has participated in the development and debate of nearly every major public policy issue of the past 30 years. Since leaving the Senate, he has remained an active and learned voice among policymakers.

NANCY M. GREEN  
Healthcare Global Lead, Verizon Enterprise Solutions  
A thought leader in the health care industry, Green drives strategic innovation partnerships with industry leaders and organizations. A 20-year health care industry veteran, Green has extensive experience in the strategy, design, development, launch and sale of advanced mobility and communications solutions and applications for the health care sector. Green is active in several professional organizations, including the American Telemedicine Association and the Healthcare Information and Management Systems Society (HIMSS). She was named to a short list of “Disruptive Women to Watch in 2014” by Disruptive Women in Health Care.

DAVID KLEIN, MBA  
Special Adviser to the CEO, University of Rochester Medical Center  
David H. Klein is a special adviser to the CEO of the University of Rochester (UR) Medical Center, a professor of public health sciences in the UR School of Medicine and Dentistry and an executive professor of health care management in the UR Simon Business School. Mr. Klein was the chief executive officer of The Lifetime Healthcare Companies (TLHC) headquartered in Rochester, NY which includes Excellus BlueCross BlueShield (BCBS), Univera Healthcare, and Lifetime Health Medical Group. Mr. Klein had been a senior executive with TLHC and its predecessor companies since 1986, serving as CEO since 2003. He was a director of the national Blue Cross Blue Shield Association (BCBSA) and America’s Health Insurance Plans.

BRUCE LEFF, MD  
Professor of Medicine, Johns Hopkins University School of Medicine  
Dr. Leff is a clinician, educator, and an internationally recognized leader and researcher on novel models of health service delivery for older adults with an emphasis on home and community-based models, the care of people with multiple chronic conditions, and quality measurement.

PHILIP LEVINSOHN, MBA, MPA  
Venture Advisor, Learn Capital  
Philip Levinson is a Venture Advisor to Learn Capital and was the first Sales & Marketing executive at TigerText, helping the company in its first 5 years as it signed its first 3,000+ enterprise & healthcare installations (including Adventist Health and Multicare Health) and closed numerous partnerships (including with CDW, Verizon, MobileIron, Amion and PointClickCare). TigerText has raised $80+ million in VC funding to date. Phil is also a Contributing Columnist at Business Insider with recent articles on Nike, CloudFlare and Uber.
SETH STERNBERG
Co-Founder & CEO, Honor
Seth Sternberg is a Co-founder and CEO of Honor, a tech-based service that transforms non-medical in-home care for the aging. Prior to Honor, Seth co-founded Meebo, serving as CEO until it was sold to Google in 2012, where he served as Product Director for the Google+ Platform.

AVIVA SUFIAN, MPP, MPH
Consultant
Ms. Sufian is a passionate leader in the field of aging. Most recently, she served in the Obama Administration, focusing on a range of issues related to aging and disability. While at the U.S. Department of Health and Human Services, she was appointed as the first Special Envoy for U.S. Holocaust Survivor Services and was also the Director of Regional Operations at the Administration for Community Living. She previously served as Associate Commissioner of External Affairs and Senior Advisor at the U.S. Social Security Administration, as well as Senior Policy Analyst at the New York City Department for the Aging.

CAROL RAPHAEL
Board Chair, AARP
Carol Raphael is a nationally recognized leader in health policy and serves on numerous boards in health care, education and human services. Prior to joining the AARP, she served as President and CEO of the Visiting Nurse Service of New York (VNSNY) for over 20 years. In 2013, Ms. Raphael was appointed by President Obama to the Bipartisan Commission on Long Term Care. She is a member of Age-Friendly New York City, a collaborative response to the demands of the city’s aging population, and is co-editor of the book “Home Based Care for a New Century.”

JOSEPH M. SMITH, MD, PhD
CEO, Reflexion Health
Dr. Smith brings more than two decades of medical, clinical, and technology leadership to Reflexion Health, a digital health and telemedicine company dedicated to bringing personalized healthcare into patients’ homes. Dr. Smith previously served as Chief Medical & Science Officer of the West Health Institute. Prior roles included leadership positions at Johnson & Johnson, Guidant/Boston Scientific and Washington University in St. Louis. Dr. Smith is an advisor to the Wellcome Trust, Johns Hopkins University and the FDA Safety Innovation Act workgroup on the regulation of HIT. He holds a BES from Johns Hopkins University, a PhD from the Harvard-MIT Division of Health Sciences and Technology, and an MD from Harvard Medical School.

SETH STERNBERG
Co-Founder & CEO, Honor
Seth Sternberg is a Co-founder and CEO of Honor, a tech-based service that transforms non-medical in-home care for the aging. Prior to Honor, Seth co-founded Meebo, serving as CEO until it was sold to Google in 2012, where he served as Product Director for the Google+ Platform.

Networking Break

10:30 - 11:00am Keynote Address
Aging by Design: Challenges & Opportunities
Drew Miller Creative Director, frog Design

11:00am - 12:00pm Panel Discussion
Successful Aging & Chronic Care
Moderated by Paula Span, Journalist, The New York Times
Bas Bloom Medical Director, Parkinson Centre Nijmegen
Cynthia Boyd Associate Professor, Johns Hopkins
Steven Landers CEO, VNA Health Group
Shelley Lyford CEO & President, West Health

12:00 - 1:00pm
Networking Lunch & Expo

1:00 - 2:00pm Panel Discussion
The Next Generation House Call
Moderated by Christina Farr, Journalist, Fast Company
Damian Gilbert Founder & CEO, TouchCare
Oscar Salazar Chief Product Officer & Co-Founder, Pager
Roy Schoenberg Co-founder & CEO, American Well
Ian Tong Chief Medical Officer, Doctor On Demand

2:00 - 2:30pm Keynote Address
Disruptive Model for the Future of Medicine
Clay Johnston Inaugural Dean & VP Medical Affairs, Dell Medical School, University of Texas at Austin

2:30 - 3:00pm
Networking Coffee Break

3:00 - 3:30pm Fireside Chat
Investment Opportunities in the Aging in Place Market
Moderated by Christina Farr, Journalist, Fast Company
Stephanie Tilenius Founder & CEO, Vida Health
Owen Tripp CEO, Grand Rounds

3:30 - 4:00pm Fireside Chat
The Changing Insurance Landscape
Moderated by Jennifer Hajj Sr. Consultant, Sachs Policy Group
Karen Ignagni President & CEO, Emblem Health
Noah Lang Founder & CEO, Stride Health

4:00 - 4:30pm Keynote Address
Honor - One Year Later
Seth Sternberg Co-Founder & CEO, Honor

4:30 - 6:00pm Networking Cocktail Reception
ELISE SWEENEY ANTHONY, JD  
Acting Director, Office Policy
Elise leads ONC’s engagement on a range of high-priority federal policy efforts, including regulatory development, information blocking, and MACRA implementation. Elise is an experienced health policy attorney and advisor, and spent many years at a leading law firm where she spearheaded a variety of health improvement initiatives.

BASTIAAN “BAS” BLOEM, MD, PhD  
Medical Director, Parkinson Center Nijmegen (ParC)
In 2002, Prof. Bloem became Medical Director of the Parkinson Centre Nijmegen, which was recognized in 2005 as a National Parkinson Foundation center of excellence. Together with Dr. Marten Munneke, he developed the national ParkinsonNet concept, which received an award for the best healthcare innovation in the Netherlands, and was awarded the prestigious Value Based Care Award in 2015.

CYNTHIA BOYD, MD, MPH
Associate Professor of Medicine, Johns Hopkins University School of Medicine
An internist, geriatrician, and epidemiologist, Dr. Boyd’s research interests include the clinical care of chronically ill and frail older adults, particularly regarding patient-centered care for people with multiple chronic conditions. She received the American Geriatrics Society’s Award for Outstanding Clinical Investigation in 2010 for her body of work.
THOMAS J. DEROSA
CEO & Director, Welltower, Inc.
Tom DeRosa is CEO of Welltower Inc. (NYSE: HCN), an S&P 500 company. Under his leadership, the company has grown into a global leader in health care real estate. Together with its operating partners, the company is connecting health care delivery providers and properties to create more healthful environments for an aging population.

CHRISTINA FARR
Journalist, Fast Company
Christina Farr is a San Francisco-based journalist specializing in health and technology. Before joining Fast Company, Christina worked as a reporter for VentureBeat, Reuters and IGED. Her byline has also appeared in USA Today, The Telegraph, NPR, Washington Post and Mashable. Christina was recently awarded “Reporter of the Year” in Rock Health’s Top 50 in Digital Health.

DAMIAN GILBERT
Founder & CEO, TouchCare
Damian Gilbert is the CEO of TouchCare, a company that created a mobile health application that connects providers with their patients via scheduled, video calls. TouchCare’s platform connects patients with their providers, whom they know and trust, a design that supports existing relationships and enhances continuity of care.

JENNIFER HAJJ, MBA
Senior Consultant, Sachs Policy Group
Since joining Sachs Policy Group in 2006, Ms. Hajj has specialized in New York State policy, strategy, and analysis. She consults with a diverse set of clients including hospitals, nursing homes, health and human service agencies, health plans, labor unions, and technology companies. Since 2013, Ms. Hajj has also led the firm’s expansion to health care technology and innovation.

KAREN IGNAGNI
President and CEO, EmblemHealth
Karen Ignagni serves as President and CEO of EmblemHealth, a New York City-based not-for-profit health insurance company. Prior to joining EmblemHealth, Ignagni was President and CEO of America’s Health Insurance Plans (AHIP) where she was active in working with the White House and congressional leadership on the development of health reform legislation.

WALTER JIN
Founding Partner, Three Fields Capital
Walter Jin has over 20 years of experience in the healthcare sector with a track record of successfully investing over $4 billion across more than 30 portfolio companies. Mr. Jin is a graduate of Harvard University and currently serves as an Executive in Residence at Johns Hopkins Medicine and an Innovation Fellows Technical Advisor to the US Department of HHS.
NOAH LANG
Co-founder & CEO, Stride Health
Noah Lang is CEO and co-founder of Stride Health, a mobile web-app that delivers intelligent health coverage investments to independent Americans. Companies like Uber, Intuit and Etsy look to Stride Health to power health care and coverage in the freelancer economy. He graduated from Stanford University as a President’s Scholar with a degree in Product Design.

SHELLEY LYFORD
President and CEO, Gary and Mary West Foundation; West Health
Shelley Lyford is president and CEO of the Gary and Mary West Foundation and West Health, which are advancing innovative healthcare delivery models that enable seniors to age successfully. Lyford chairs the board of directors for the Gary and Mary West Senior Dental Center and serves on the Executive Committee of Grantmakers in Aging.

THOMAS MCINERNEY
President and CEO, Genworth Financial
Mr. McInerney joined Genworth in January 2013 from the Boston Consulting Group, where he had served as Senior Advisor since June 2011. Prior to that, Mr. McInerney spent 30 years working with ING Groep, NV, and Aetna Inc. For many years, he has been active with the American Council of Life Insurers and the Financial Services Roundtable.
ROY SCHOENBERG, MD, MPH
Co-Founder & CEO, American Well
Roy is co-founder and CEO at American Well where he introduced the patented service brokerage technology that powers the nation’s largest Telehealth network. Roy serves on the board of the American Telemedicine Association and received their 2014 award for leadership. Roy holds an MD from Hebrew University and an MPH from Harvard.

PAULA SPAN
Author & Journalist, The New York Times

SETH STERNBERG
Co-Founder & CEO, Honor
Seth Sternberg is a co-founder and CEO of Honor, a tech-based service that transforms non-medical in-home care for the aging. Prior to Honor, Seth co-founded Meeco, serving as CEO until it was sold to Google in 2012, where he served as Product Director for the Google+ Platform.

DREW MILLER
Creative Director, frog
Over the last 7 years at frog, Drew has led numerous projects to bring together the physical and digital worlds to create thoughtful user experiences. Drew has developed ecosystems for Healthcare, the Connected Home, Customer Service and Support, Entertainment Media, Hospitality, and E-Commerce for clients such as Merck, Honeywell, Disney, and AT&T.

JONATHAN RAUCH
Author and Journalist
A senior fellow at the Brookings Institution in Washington, Mr. Rauch is the author of six books and numerous articles on public policy, culture, and government. He is a contributing editor of National Journal and The Atlantic. Mr. Rauch is the recipient of several awards including the 2003 National Magazine Award, the magazine industry’s equivalent of the Pulitzer.

OSCAR SALAZAR
Chief Product Officer and Co-Founder, Pager
Oscar is the Chief Product Officer and Co-Founder of Pager. Oscar has been a part of several successful ventures. He is the founding CTO of Uber and current advisor, as well as the VP of Technology at Ride and CEO of Citrix.

ROY SCHOENBERG, MD, MPH
Co-Founder & CEO, American Well
Roy is co-founder and CEO at American Well where he introduced the patented service brokerage technology that powers the nation’s largest Telehealth network. Stephanie Tilenius, MBA
Founder & CEO, Vida

Stephanie is founder and CEO of Vida, a next-generation mobile continuous care platform for preventive health and chronic health conditions. Prior to Vida, Tilenius was with KPCB, where she worked primarily with late-stage portfolio companies. Prior to KPCB, Stephanie was VP of global commerce and payments at Google. She holds an MBA from Harvard.

Ian Tong, MD
Chief Medical Officer, Doctor On Demand

Prior to joining Doctor On Demand, Ian had multiple medical leadership roles including Founder and Medical Director of THRIVE (The Health Resource Initiative for Veterans Everywhere) and Co-Medical Director of the Arbor Free Clinic. Ian earned a medical degree from The University of Chicago-Pritzker and is board certified in Internal Medicine.

Owen Tripp, MBA
Co-Founder & CEO

As co-founder and CEO of Grand Rounds, Owen believes that patients will achieve better healthcare outcomes through the intersection of technology, medical expertise, and extraordinary patient care. Prior to Grand Rounds, Owen co-founded Reputation.com. Owen received an MBA from Stanford and was recently named a Global Technology Pioneer by the World Economic Forum.

Debra Whitman, PhD
Chief Public Policy Officer, AARP

As AARP’s chief public policy officer, Debra Whitman leads policy development, analysis, research, and global thought leadership to advance the interests of individuals 50-plus and their families. An economist, she is an authority on aging issues and has extensive experience in national policymaking and domestic and international research. Dr. Whitman holds master’s and doctorate degrees in economics from Syracuse University.
Grand Rounds’ vision is to create a path to great health and healthcare for everyone, everywhere. Founded in 2011, the company provides an employer-based platform that delivers improved outcomes for patients and their families. It does this through an end-to-end solution that connects patients with care informed by the latest and best practices—preventing and correcting misdiagnoses and unnecessary or failed treatments. Recently named second among Glassdoor’s Best Places to Work, Grand Rounds helps restore individual health and quality of life, and offers employers lower health care spend and higher employee productivity. For more information, please visit grandrounds.com or follow us on Twitter @GrandRoundsInc.
Verizon Enterprise Solutions for cloud, hosting, and colocation provide connectivity, availability, and reliability that can be cost-prohibitive to manage on your own. It is now possible to store, manage, and safeguard ePHI outside your four walls, making it easier to collaborate and coordinate care. Verizon’s portfolio of solutions helps you to control capital expenses while improving IT performance and eliminate the hassle of maintaining on-site equipment. Verizon’s Enterprise Solutions align with applicable HIPAA security requirements and support a connected infrastructure to manage and exchange ePHI. Verizon also offers Healthcare Fraud Management solutions, designed to fend off healthcare fraud at the source through the application of technologies that specifically predict and identify potential threats. With Verizon’s Healthcare Fraud Management solutions, it is now possible to control costs, use internal resources for case resolution, and power your mission to provide the best possible care.

Teva Pharmaceutical Industries Ltd. is a leading global pharmaceutical company that delivers high-quality, patient-centric healthcare solutions used by millions of patients every day. Headquartered in Israel, Teva is the world’s largest generic medicines producer, leveraging its portfolio of more than 1,000 molecules to produce a wide range of generic products in nearly every therapeutic area. In specialty medicines, Teva has a world-leading position in innovative treatments for disorders of the central nervous system, including pain, as well as a strong portfolio of respiratory products. Teva integrates its generics and specialty capabilities in its global research and development division to create new ways of addressing unmet patient needs by combining drug development capabilities with devices, services and technologies. Teva’s net revenues in 2015 amounted to $19.7 billion.
Solely funded by philanthropists Gary and Mary West, the Gary and Mary West Health Institute is a nonprofit medical research organization dedicated to supporting and creating healthcare delivery models that enable seniors to successfully age on their own terms, preserving and protecting their dignity, quality of life and independence.

The Gary and Mary West Foundation is a private, non-operating foundation solely funded by Gary and Mary West, dedicated to helping make successful aging a reality for America’s seniors. Working in collaboration with the Gary and Mary West Health Institute and the Gary and Mary West Health Policy Center, these organizations use applied medical research, policy and advocacy initiatives with outcomes-based funding from the foundation. Collectively, they work to enable seniors to age in place, on their own terms, preserving and protecting their dignity, quality of life and independence.

Founded in 1912, Visiting Nurse Association (VNA) Health Group is New Jersey’s largest and the nation’s second largest not-for-profit visiting nurse association. Each year we help more than 120,000 individuals and families— with a special focus on vulnerable populations—achieve their best level of health and well-being by providing home health, hospice, palliative and community-based care and private-pay personal care. A full range of primary-care and dental services are available through VNACJ Community Health Centers, a Federally Qualified Health Center (FQHC), and “house call” visiting physician services for individuals with limited mobility. Our Connected Health Institute drives innovation in the development of digital and mobile technology to link patients, caregivers and clinicians.
At the Goergen Institute for Data Science, Rochester interdisciplinary researchers are harnessing the potential of data in ways that will transform knowledge, discovery, and innovation in the 21st century. The Institute is the home of graduate and undergraduate degree programs in data science, and supports faculty and researchers across the university, with an emphasis on healthcare, artificial intelligence, and big data systems.

American Well transforms healthcare delivery through telehealth. We make online doctor visits accessible to everyone for one-off care issues like colds or infections, and chronic condition management, such as diabetes or depression. We deliver healthcare into people’s homes and workplaces through our work with top health plans, health systems and employers, as well as our telehealth app, Amwell. A patient using Amwell can connect to a board-certified doctor of their choosing in just minutes for a visit carried out over smartphone, tablet, kiosk, phone, or desktop. For more information on our services, visit www.americanwell.com. To download Amwell and have a doctor visit now, visit www.amwell.com.

Genworth Financial, Inc. (NYSE: GNW) is a Fortune 500 insurance holding company committed to helping families achieve the dream of homeownership and address the financial challenges of aging through its leadership positions in mortgage insurance and long term care insurance. Headquartered in Richmond, Virginia, Genworth traces its roots back to 1871 and became a public company in 2004. For more information, visit genworth.com.

Johns Hopkins Medicine, headquartered in Baltimore, Maryland, is a $7 billion integrated global health enterprise and one of the leading health care systems in the United States. Uniting physicians and scientists of the Johns Hopkins University School of Medicine with the organizations, health professionals and facilities of The Johns Hopkins Hospital and Health System, Johns Hopkins Medicine (JHM) educates medical students, scientists, health care professionals and the public; conducts biomedical research; and provides patient-centered medicine to prevent, diagnose and treat human illness vision. JHM’s vision, “Together, we will deliver the promise of medicine,” is supported by its mission to improve the health of the community and the world by setting the standard of excellence in medical education, research and clinical care.
TouchCare is simplifying health care and creating a personalized network of patients, providers and institutions. This robust telemedicine solution connects patients to the doctors they know and trust through secure, face-to-face video calls via smartphones or tablets. Credit card billing and an online portal empower providers to improve workflow and efficiency. Some of America's leading medical centers are already using TouchCare to strengthen relationships and reduce costs. For more information, visit: www.touchcare.com.

Since the dawn of the 20th Century, I have witnessed great moments of humanity. I have journeyed into space on board Soyuz 19 and bound men together in oaths of allegiance and honored their triumphs. I pioneered flavored vodkas in the 60’s and have mixed cocktails for the finest actors and the greatest Presidents.

I have no official birthday, but for more than 80 years have been produced to the same traditions and highest quality standards.

Lundbeck is a global pharmaceutical company specialized in brain diseases. For more than 50 years, they have been at the forefront of research within neuroscience. Their key areas of focus are alcohol dependence, Alzheimer’s disease, bipolar disorder, depression/anxiety, epilepsy, Huntington’s disease, Parkinson’s disease, schizophrenia and symptomatic neurogenic orthostatic hypotension (NOS). An estimated 700 million people worldwide are living with brain disease and due to inadequate treatment, discrimination, a reduced number of working days, early retirement and other unnecessary consequences. Lundbeck strives for improved treatment and a better life for people living with brain disease.

MC10 is a private company, backed by a strong syndicate of financial and strategic investors, that is improving human health through digital healthcare solutions. The company combines its proprietary ultra-thin, flexible body-worn sensors with advanced analytics to unlock health insights from physiological data. MC10 has received widespread recognition for its revolutionary technology and was recently named in Fast Company’s Most Innovative Companies in 2016 as a leader in healthcare. MC10 is headquartered in Lexington, MA. Visit MC10 online at www.mc10inc.com.
